Cultural Dynamics in Marriage

Within the context of Hispanic and Latin American values and cultural landmarks, we find that a myriad of the central issues in Carlos and Lydia's situation are related to this area. Despite the hardships that Carlos faces as a child raised by a single mother who is determined to keep the bond between the child and his father healthy and strong, he feels obliged to remain part of his father's life. Such a proposal to move Carlos's father into their household disgusts the idea of providing aid to different age groups of Hispanics (Forcén et al., 2023). Lydia's hunger for a calm family and conventional requirements to be an occupant may be mixed with prevalent women's norms. The main factor that influences how a multicultural couple goes about their marriage and what each spouse is supposed to bring into a relationship is these cultural expectations, although they can be subconscious. In addition, faith and spirituality are considered central components of family structure.

The utilization of the audience by the protagonists in this scenario demonstrates a good blending of traditional wisdom and a modern approach to the problem. In a mythical world where faith is as powerful as the winds, their prayers offer a perspective of relying on faith in the face of adversities, which aligns with the cultural value of resilience and dependence on a higher power. Pride in history, bravery, and the importance of respect cannot be disregarded when it comes to Hispanic interactions (Portillo et al., 2023). Lydia's hesitation to call Carlos's father to their home as a family member has underscored the duplicity of feelings one gets while making a kiss-off between family and private domains. Finding a balance between this duality and considering each other's viewpoints is not easy, but it leads to marital happiness. Hence, the two main problems of Carlos and Lydia are linked to the navigation through this tangible territory of the combination of Hispanic and Latino American values with their unique backgrounds and

expectations. For their multicultural marriage, understanding the underlying culture of their descent is the same as respecting the culture and helping develop empathy, communication, and support for each other.
